

I don't believe that companies that we do business with should be able to call us whenever they want to. Almost all of them are unwanted and they always interrupt during dinner time. I do not want these phone calls. My home phone, and cell phones are on the Do Not Call List. I like not getting the annoying calls all hours of the night. Please do not let the Consumer Bankers Association be able to change the Indiana's Telephone Privacy law by allowing them to call consumers with telemarketing phone calls. Thank you.
